

The polluted atmosphere as a shallow domain

Nora Juhasz
DISIM, University of L'Aquila, Italy
ms.juhasz.nora@gmail.com

The equations of the polluted atmosphere

Navier – Stokes equations combined with convection–diffusion:

% EQST 1
% EQST 2
% EQST 3
% EQST 4
% EQST 5
% EQST 6

Smart note on one of the equations:
% EQST 6 comment

The smart comment in details.

Shallow domain in fluid dynamics

Discuss shallow domains. Ocean, salinity, atmosphere, pollution.

Fancy comment

Exciting and clever highlight.

Compactness

Issues.

\Compactness stuff.
More compactness stuff.

Useful Macro Within Block Nodes

There are three types of colored boxes/blocks that you can use inside block nodes to highlight information.

Theorem

Statement

\innerblock{Theorem}{Statement}

Text

\innerblockplain[colorone!80!]{Text}

Text

\coloredbox{colorthree!50!}{Text}

Let's see some figures.

Fig. 1: A local slice of the atmosphere

Personalizing the Poster

It is possible to adjust the layout of the poster. To impose your own setting, you can use these macros:

- Macros for changing sizes
- Other structural macros
- Macro for adding logos to the title block
- Macros for the basic colors
- Macros for specific colors:

There are also callout blocks that allow for a more interesting layout of the poster.

\calloutblock[rotate angle]{from coordinate}{coordinate}{Block Width}{Block Content}

The alias for such blocks is *note*.
