

PhD report for the academic year 2017/2018

Merged mathematical models of the polluted atmosphere

Nora Juhasz

Department of Information Engineering, Computer Science and Mathematics
University of L'Aquila
Supervisor: Prof. Donatella Donatelli

18th October, 2018

Lectures

- Physics of the atmosphere, fall semester 2017

Seminars, workshops, summer schools

- Short course on Evans function methods in the stability analysis of periodic wavetrains, Prof. Ramon Plaza, 24-29 Nov 2017
- Mini course on numerical methods for hyperbolic systems, GSSI, Prof. G. Russo
